

Logan Stuck

Public Health Evaluation and Evidence Specialist

Maasbommel, Netherlands | logan@loganstuck.com | loganstuck.com

Public health evaluation and evidence specialist with expertise in epidemiology, household surveys, monitoring and evaluation, applied statistics, GIS, and evidence-informed decision support. PhD in epidemiology focused on malaria evaluation and elimination in Zanzibar, and a master's in biostatistics. More than one year of cumulative professional experience in sub-Saharan Africa, including living in Zanzibar. Works with research and implementation partners to translate findings for governments, NGOs, funders, and other decision-makers.

Focus: household-survey-based programme evaluation conducted with institutions and researchers in low- and middle-income countries. Interested in research and evaluation roles and independent consultancies spanning malaria, tuberculosis, and broader public health and international development.

Collaborations across the United States, the Netherlands, Ethiopia, Ghana, South Africa, Tanzania, Uganda, Zambia, and Zimbabwe.

CORE SKILLS

Evaluation: programme and intervention evaluation, mixed-methods evaluation, monitoring and evaluation, implementation research, evidence translation, stakeholder reporting. Surveys and fieldwork: study design, sampling, weighting, questionnaire development, digital data collection, field-team training, data-quality assurance. Analysis: epidemiology, biostatistics, complex survey analysis, GIS and spatial analysis, data visualisation, reproducible reporting, statistical modelling. Tools: R, R Markdown, Shiny, ggplot2, QGIS, ArcGIS, ODK, SAS, STATA, Git, LaTeX.

PROFESSIONAL EXPERIENCE

2024 - February 2027

Applied Statistician

Biometris, Wageningen University and Research | Wageningen, Netherlands

- Provide statistical consulting for public health and applied research teams, including multi-country analytics for SHIFT2HEALTH.
- Design studies, analyses, and reproducible workflows that connect complex health data to practical decisions.
- Collaborate with researchers, policymakers, and implementation partners to align statistical methods with real-world evidence needs.
- Translate complex analytical results into clear recommendations, reports, and decision-ready outputs.

2020 - 2023

Epidemiologist and Statistician

Amsterdam Institute for Global Health and Development | Amsterdam, Netherlands

- Led analyses for programme evaluations, national TB prevalence surveys, individual participant data meta-analyses, and clinical trials.
- Coordinated and harmonised national TB prevalence survey data with ministry and research partners across Africa and Asia, contributing to Lancet Infectious Diseases evidence.
- Applied complex survey methods, causal inference, survival analysis, and statistical modelling to assess infectious-disease burden and intervention performance.
- Mentored PhD and MSc students and translated complex findings for manuscripts, collaborators, and public health stakeholders.

2020 - 2023

Lecturer in Statistics

Vrije Universiteit Amsterdam | Amsterdam, Netherlands

- Developed and taught epidemiology and statistics courses for Research Master's in Global Health students.
- Designed lectures, practical sessions, and workshops on biostatistics, causal inference, and data analysis.
- Created and graded assignments, exams, and research projects to assess statistical competencies.

2019 - 2020

Postdoctoral Statistician, Epidemiologist, and Data Scientist

Tulane University School of Public Health and Tropical Medicine | New Orleans, Louisiana

- Conducted malaria programme evaluations assessing intervention effectiveness, transmission patterns, and surveillance performance.
- Led epidemiological and statistical analyses that informed malaria control and elimination strategies.
- Provided on-site training for household-survey data collection, strengthening data quality and field implementation.
- Contributed to peer-reviewed publications, grant development, and capacity-building initiatives in malaria research.

2015 - 2019

Research Assistant

Tulane University School of Public Health and Tropical Medicine | New Orleans, Louisiana

- Led evaluation of reactive case detection for malaria in Zanzibar, from study design and field implementation to epidemiological and spatial analysis.
- Supported questionnaire development, field-team training, data-quality monitoring, and household-survey analysis for malaria intervention evaluations.
- Collaborated with health authorities and malaria programmes to translate findings into implementation strategy.

2013 - 2015

Biostatistician Consultant

HealthPartners Institute for Education and Research | Bloomington, Minnesota

- Conducted power analyses and simulations for complex multicenter trials.
- Built randomization schedules, managed data, and conducted final analyses of trial data.
- Collaborated with principal investigators to interpret statistical findings accurately.

SELECTED EVALUATION AND RESEARCH PROJECTS

Reactive Case Detection in Zanzibar

2016 - 2019 | Tulane University

Led study design, field implementation, and epidemiological and spatial analyses of malaria reactive case detection, translating findings with health authorities into options for elimination surveillance.

Tanzania School Net Programme

2016 - 2019 | Tulane University

Supported questionnaire development, field-team training, data-quality monitoring, and household-survey analysis to evaluate school-based distribution of insecticide-treated nets.

Ethiopia Malaria Indicator Survey

2016 | Tulane University

Led design-adjusted analysis of a national household survey, including weighting, malaria prevalence, intervention coverage, and geographic differences, contributing to the official report for health authorities and partners.

Zimbabwe Assistance Program in Malaria Assessment

2019 - 2020 | Data for Impact and USAID

Directed a mixed-methods evaluation combining routine programme data and qualitative research, with recommendations for PMI, USAID, and national malaria programme strategy.

Subclinical Tuberculosis IPD Meta-Analysis

2021 - 2024 | Amsterdam Institute for Global Health and Development

Led data coordination, harmonisation, and design-adjusted analysis across national TB prevalence surveys in Africa and Asia, working with ministry and research partners to produce policy-relevant evidence.

Trachoma Prevention Programme Evaluation

2020 - 2021 | Tulane University and Sightsavers

Analysed pre- and post-intervention surveys from more than 3,000 households and 100 schools in Malawi, Tanzania, and Uganda, translating findings into recommendations for hygiene and sanitation programmes.

BCG Vaccine Effectiveness IPD Meta-Analysis

2022 - 2024 | Amsterdam Institute for Global Health and Development

Provided methodological guidance on study design, data harmonisation, statistical modelling, interpretation, and manuscript development for a Lancet Microbe study.

SHIFT2HEALTH Analytics Support

2025 - Present | Wageningen University and Research

Statistical and data science support for a multi-country study of behavioural, physiological, nutritional, and environmental contributors to obesity in shift workers.

Rift Valley Fever Vaccine Trial Modelling

2024 - Present | LARISSA consortium

Epidemiological modelling, power calculations, and trial simulations for hRVFV-4s vaccine evaluation strategy.

EDUCATION

PhD Epidemiology

Tulane University School of Public Health and Tropical Medicine, 2015 - 2020

Dissertation: An Evaluation of Reactive Case Detection for Malaria in Zanzibar.

MS Biostatistics

University of Minnesota School of Public Health, 2010 - 2013

Thesis: Spatial Quantification of Intra-Tumoral Heterogeneity.

BA Biology

St. Olaf College, 2005 - 2009

TEACHING AND CAPACITY BUILDING

- Co-Instructor, Nutrition and Infectious Disease, Health Sciences Master's, Vrije Universiteit Amsterdam, 2023.
- Lead Instructor, Introduction to Statistics, Research Master's in Global Health, Vrije Universiteit Amsterdam, 2021 - 2023.
- Co-Instructor, Intermediate Statistics and Epidemiology, Research Master's in Global Health, Vrije Universiteit Amsterdam, 2020 - 2023.
- Co-Instructor, Figure it Out, Applied Research, Research Master's in Global Health, Vrije Universiteit Amsterdam, 2020 - 2023.
- Guest Lecturer, Study Design in Quantitative Research, Department of Tropical Medicine, Tulane University School of Public Health and Tropical Medicine, 2020.
- Designed and led data analysis and GIS workshops for surveillance, monitoring, and evaluation officers in Tanzania and Zanzibar, 2019.
- Guest Lecturer, Surveillance in Malaria Elimination, Department of Tropical Medicine, Tulane University School of Public Health and Tropical Medicine, 2017.
- Co-promotor and methodological mentor for doctoral and master's students.

GRANTS, CONTRACTS, AND CONSULTANCIES

- CEPI, LARISSA II: Novel Rift Valley Fever Vaccine Development, 2024 - Present. Role: Trial feasibility modeller.
- Mr. Willem Bakhuys Roozeboomstichting, TBPS-Meta: Tuberculosis Prevalence Survey Meta Analyses, 2023. Role: Principal investigator.
- Amsterdam Tuberculosis Center, scTB-Meta: Subclinical Tuberculosis Meta Analyses, 2021 - 2023. Role: Principal investigator.
- USAID, Associate Award: Technical assistance and support for community-based malaria surveillance in Tanzania, 2017 - 2019. Role: Co-investigator for sub-study.
- PATH / MACEPA / Gates Foundation, technical and scientific support to MACEPA activities in Zambia, 2017 - 2019. Role: Analytic and field support.
- USAID, VectorWorks, 2016 - 2019. Role: Analytic and field support.
- Data for Impact, Assessment of the Zimbabwe Assistance Program in Malaria, 2019 - 2020. Role: Evaluation consultant.
- Sightsavers, Schistosomiasis and Helminthiasis School Survey in Guinea-Bissau, 2018. Role: Consultant.
- Sightsavers, Multi-country WASH intervention trial in sub-Saharan Africa, 2017 - 2018. Role: Consultant.
